Devanandh K

Aspiring MERN Stack Developer

Kanchipuram, Tamil Nadu, India | devanandhkathirvel@gmail.com | +91 9787478553
linkedin.com/in/devanandh-k-csa | github.com/Deva468 | devanandhk.vercel.app

PROFESSIONAL SUMMARY

Aspiring MERN Stack Developer with a cyber security foundation, focused on building secure, responsive full-stack web applications. Hands-on with React.js, Node.js, Express.js, and MongoDB, including REST API development, user authentication, and payment gateway integration, and skilled at turning Figma designs into clean, working interfaces. Applies a security-first approach to development and is preparing for the CEH certification. Learning Japanese (NAT-TEST 5Q/4Q) with interest in Full Stack Development, Cyber Security, and Japanese-language IT roles such as localization testing, QA, and IT support. Seeking a fresher Software Developer role to build reliable, secure web products.

TECHNICAL SKILLS

Languages	: JavaScript, Java, HTML5, CSS3
Frameworks & Libraries	: React.js, Node.js, Express.js, Mongoose, Tailwind CSS
Databases	: MongoDB
Concepts	: REST APIs, CRUD Operations, Authentication, Payment Gateway Integration, Responsive Web Design, UI/UX Design, Version Control
Cyber Security	: Network Security, Web Security, Vulnerability Assessment, Ethical Hacking (Fundamentals)
Security Tools	: Kali Linux, Wireshark, Burp Suite, Nmap
Dev Tools	: Git, GitHub, VS Code, Figma, Vercel, Render, Notion, Jira

WORK EXPERIENCE

Web Development and Designing Intern, *OASIS Infobyte* Sep 2026 – Oct 2026

- Engineered a Pizza Delivery & Inventory Management application on the MERN stack using 4 technologies (React.js, Node.js, Express.js, MongoDB), covering 3 workflows: ordering, stock tracking, and admin
- Integrated the Razorpay payment gateway for secure online payments and delivered the complete project within a 2-month internship

Frontend Developer Intern, *NoviTech R&D Pvt Ltd* Jan 2026 – Feb 2026

- Developed the frontend of an e-commerce web application with React.js, HTML, CSS, and JavaScript in a 2-month internship, covering 3 core screens: product listing, cart, and checkout
- Delivered a fully responsive UI that works consistently across 3 screen sizes: mobile, tablet, and desktop

Frontend Developer Intern, *SkillSync* Jan 2026 – Feb 2026

- Converted Figma designs into reusable React components and responsive layouts within a 2-month internship, reducing duplicate UI code across pages

Web Development Intern, *Ekhie Business Solutions* Mar 2025 – Apr 2025

- Recreated company web pages from Figma files as responsive components with HTML, CSS, JavaScript, and React.js over 2 months, collaborating with the team on feedback to refine the user experience

UI/UX Designing Intern, *Industrial Design & Animation* Jul 2025 – Aug 2025

- Designed a Rent Management App in Figma over a 2-month internship, taking it from wireframes to interactive prototypes for 2 platforms (mobile and desktop) and iterating on usability feedback

EDUCATION

B.E. Computer Science and Engineering (Cyber Security) 2023 – 2027
Dhanalakshmi College of Engineering CGPA: 8.14 (till 6th Semester)

Higher Secondary Certificate (HSC) 2021 – 2022
Govt. Higher Secondary School, Ayyangarkulam, Kanchipuram 82.33%

PROJECTS

CoreDesk – IT Service Desk Platform (MongoDB, Express.js, React.js, Node.js) Live Demo

- Architected a full-stack IT service desk ticketing platform on the MERN stack, with 4 core workflows (tracking, triaging, assigning, and resolving support requests) and real-time analytics
- Implemented user signup and authentication and 4 CRUD operations (create, read, update, delete) on tickets through REST API endpoints, with status management and MongoDB (Mongoose) storage

CyberShield – Cyber Security Chatbot (HTML, CSS, JavaScript) Live Demo

- Created a rule-based cybersecurity awareness chatbot that answers 50+ topics (phishing, malware, ransomware, network security) in real time using keyword-based matching
- Launched a clean chat interface with 5 quick-start question prompts, deployed live on Vercel

Password Strength Analyzer (HTML, CSS, JavaScript) Live Demo

- Built a real-time analyzer that scores password strength from 0 to 100 with a live strength meter
- Guided users toward stronger passwords with actionable security feedback (length, character variety, common patterns), processing 100% of input client-side so no password data leaves the browser

Japanese Vocabulary Quiz (HTML, CSS, JavaScript, React.js) Live Demo

- Coded an interactive React.js vocabulary quiz with level-based questions matched to JLPT-style difficulty, instant answer feedback, real-time score tracking, and reusable components for adding new levels

CERTIFICATIONS

Completed : Novi-Tech – UI/UX Design and Frontend Development | Supraja – Cyber Security Workshop | GUVI | Coursera
In Progress : CEH (Certified Ethical Hacker) | NAT-TEST 5Q (Japanese)
